SKILLS

- Flutter App Development
- Android App Development
- Full Stack Development
- Frontend Development (Flutter/React Native)
- Backend Development (Node.js, Express.js)
- RESTful APIs
- Firebase (Auth, Firestore, Storage, Functions)
- Real-time Communication (Sockets)
- MongoDB
- Payment Integration (Razorpay)
- Google Maps SDK & APIs
- Data Structures & Algorithms (DSA)
- Machine Learning (Basic)
- Git & GitHub
- Video Editing (Premiere Pro, CapCut)

INTERESTS

- Problem Solving
- Building small, useful daily life apps
- Agentic AI and Deep Learning

HOBBIES

- Solving random problems on LeetCode
- Video Editing
- Gaming (Valorant)
- Chess

EDUCATION

B.Tech (Computer Science & Engineering)

Delhi Technological University (DTU)

2024 – 2028 | 2nd Year (Undergraduate)

Class 8 – 12

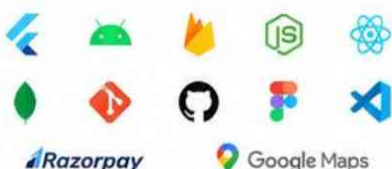

Sri Krishan Public School

96.4% in Class 12

Class 1 – 7

Jai Deep Public School

TOOLS & TECHNOLOGIES

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented App Developer and Full Stack Developer with hands-on experience in building scalable mobile and web applications. Strong foundation in DSA, Machine Learning and modern frameworks. Passionate about problem solving and creating impactful solutions.

EXPERIENCE

App Developer Intern – RayGlides (DTU IIF)

May 2024 – Aug 2024

Delhi Technological University Innovation & Incubation Foundation

(3 Months)

- Developed and maintained cross-platform application using Flutter.
- Implemented secure Login system with Authentication and Authorization.
- Built Live Ride Tracking and Live Location Tracking using Sockets.
- Implemented Shared Rides feature to optimize ride experience.
- Driver Side Features:
 - Driver Rating system
 - Wallet system
 - Device Battery monitoring
 - Nearby Charging Stations integration
- Implemented feature to show most nearby passengers to pick and areas with high passenger demand.
- Key Idea & Implementation:** Proposed and implemented Negative Balance System to handle cases where users book rides but abandon them. Users must clear negative balance before taking next ride so drivers get compensated for their waiting time. Handled all edge cases and test scenarios before implementation.
- Technologies Used:** Flutter, Firebase (Auth, Firestore, Storage, Functions), Razorpay API, Google Maps SDK & APIs, Sockets

Freelance Full Stack Developer

Jan 2024 – Apr 2024

Developed a full stack jewellery website for a client.

- Built responsive frontend and secure backend.
- Integrated payment gateway and admin panel.
- Tech Stack:** Flutter Web, Node.js, Express.js, MongoDB, Razorpay API

PROJECTS

1. RayGlides – Smart Ride Hailing App (DTU IIF Project)

Cross-platform ride-hailing app with real-time tracking, shared rides, driver features, wallet, and live location updates.

Tech: Flutter, Firebase, Google Maps SDK, Sockets, Razorpay

2. Jewellery E-Commerce Website (Freelance)

Full stack e-commerce platform for client to showcase and sell jewellery online.

Tech: Flutter Web, Node.js, MongoDB, Razorpay, Firebase Storage

ACHIEVEMENTS

- Secured 9.9 CGPA in First Semester.
- Scored 96.4% in Class 12.
- Won 1 Hackathon at MSIT Hackavensis.
- Team selected at Bharat Mandapam in India Innovate Hackathon.

CERTIFICATIONS

- Machine Learning Specialization by DeepLearning.AI (Coursera)
- Applied Machine Learning in Python (Coursera)
- Flutter Development Certificate (Tutodude)
